FOR IMMEDIATE RELEASE
7 November, 2014

Constanta, Romania:

PETRO JOBS RECRUITMENT successfully participated and exhibited at the Offshore Energy Exhibition & Conference 2014 trade fair in Amsterdam on 28 and 29 October, taking its offshore marine recruitment solutions to a host of Dutch owners and shipmanagers who are engaged in deep sea oil and gas mining.

The 7th Offshore Energy Exhibition & Conference (OEEC) attracted 13,452 visitors representing 81 countries. OEEC 2014 featured 630 exhibitors on 21,000 sq.m. floor space and 106 speakers in 22 sessions.

This year, OEEC was inaugurated by María de Lourdes Melgar Palacios, Undersecretary of Hydrocarbons of Mexico, who as the keynote speaker spoke about the Mexican energy reform and its emphasis on increasing private sector participation through free competition. Dr. Melgar opened the event along with Pieter van Oord, CEO of Van Oord and Chairman of the Association of Dutch Suppliers in the Oil & Gas Industry IRO and Coert van Zijll Langhout, Director of Navingo BV, promoter of OEEC.

Petro Jobs Recruitment used its participation at OEEC 2014 to interact with the Dutch and European offshore energy players, and highlight the availability in Romania of reliable and experienced seafaring talent in the energy transport sector. "The Netherlands is an important market for us because of the high concentration of specialist vessel operators and offshore energy

players who work in the North Sea oil wells," said Adrian Andrusca, CEO, Petro Jobs Recruitment.

Offshore Energy brought together Dutch industry giants as well as a host of international clients, OEMs, EPC companies and suppliers whose main business focuses on oil and gas exploration and production as well as marine renewable energy development. The conference organized expert debates on trends in financing and resourcing in the offshore industry, permanent well abandonment as well as technical and regulatory developments in wave and tidal energy.

AMSTERDAM | THE NETHERLANDS

"Offshore manpower will increasingly become an important topic as the price of oil continues to drop and supply hits an all-time low. The question everybody is asking is how is the offshore energy segment going to adjust its wage bill and still expect to attract qualified talent to their operations?" Mr. Andrusca added.
